

DIGITAL 60 SECOND SPRINT DIVISION

Keep scrolling to see
what's included!

LOOKING FOR A QUICK, NO-PREP WAY TO BUILD DIVISION FACT FLUENCY?

Covers every division fact family from $\div 1$ to $\div 12$, plus a Mixed Facts set!

Automatically times each sprint for 60 seconds and randomly tests facts.

Automatically marks responses and highlights the facts that need more practice!

INCLUDES ALL THESE AND MORE!

THE SYDNEY TEACHER

Digital 60 Second Sprint: Division

Thank you for purchasing this digital 60 Second Sprint tool.

This is designed to be used in conjunction with my broader division fluency routine, after students have sorted their facts on flash cards and practised their unknown facts with the 3C method. If you need more information on the routine, you can read my free fluency guide here: thesydneyteacher.com/pages/division-routine

Using this digital tool allows all the students in your class to complete their sprint at the same time, with results delivered instantly, saving you so much time!

Scan to open the tool

How it works

- 1 Provide students with access code
- 2 Enter the access code:

This code only needs to be entered once, then students then use a different code for each sprint.
- 3 Students choose which division facts to practice, enter their name, and share a screenshot of their results.

- 4 Once students click "Start the sprint", they are taken to a page showing their results and accuracy as a percentage. They'll also see the facts that need more practice and whether they've met the fluency target of 40 correct answers per minute.

5 Once the 60 second timer is up, students are taken to a page showing their results and accuracy as a percentage. They'll also see the facts that need more practice and whether they've met the fluency target of 40 correct answers per minute.

WHAT'S INCLUDED?

Access for you and your students to the **online 60 second sprint tool**

$\div$ 1–12 facts, plus a Mixed Facts set

Automatic **60 second timing** and **instant self-marking**

Comprehensive teacher guide for implementation and **single classroom license**

HOW DOES THIS WORK?

-  Provide students with access to the webpage, either by typing the URL or using the QR code.
-  Enter the access code.
-  Students choose which division facts to practise and can enter their name to easily share their results after the sprint.
-  After 60 seconds, students see their score, accuracy, facts to practise, and whether they reached the 40-per-minute fluency target.
-  At the bottom of the page, students have the option to download or save their results for printing or sharing.

HOW YOU CAN USE THIS RESOURCE

-  Use it as a quick 60-second maths warm-up to build division fluency.
-  Let students choose a division fact family for targeted independent practice.
-  Review scores and accuracy to monitor progress and identify facts that need more practice.

HAVE YOU SEEN THIS?

Want to build multiplication fluency alongside division facts? Try the **Digital 60 Second Multiplication Sprint** for quick, self-marking practice with instant results and no printing or marking required!
